DETAILED ACTION

Response to Amendment

This action is in response to the Applicants' amendment filed on October 16, 2007. Claims 1-61 are pending. Claims 40-61 were withdrawn in a previous Office Action and remain withdrawn. Claim 2 has been cancelled. Claims 1 and 3-39 will be considered for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellis et al. (US 6,275,268 B1) ("Ellis").

Referring to claim 1: Ellis teaches a method in a media service system for transaction configuration, the method comprising the steps of:

enabling at least one selection by a user of at least one transaction
 configuration option wherein the at least one transaction configuration

option is a single execution option (Abstract, lines 16-24; col. 1, lines 13-20; col. 5, lines 20-25); and

- implementing at least one transaction process responsive to the selection of the at least one transaction configuration option in the media service system, wherein implementing the at least one transaction process responsive to at least one selection of the single execution transaction option in the media service system enables a subscriber to initiate and complete an entire purchase of media content in one execution (col. 1, lines 13-20; col. 5, lines 20-25; col. 33, lines 42-56);
- wherein purchased media content is provided to at least one client device
 via said media service system (Figure 26; col. 19, lines 61-65).

Referring to claim 3: Ellis teaches the execution is the depression of a remote button (col. 1, lines 13-20).

Referring to claim 8: Ellis teaches that the user is a subscriber (col. 35, lines 34-46).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/894,508

Art Unit: 3625

Claims 4-7 and 9-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al. (US 6,275,268 B1) ("Ellis") in view of Official Notice. Ellis does not teach that the user is an administrator. However, Official Notice is taken that it is old and well known in the art for an administrator to access a system under his or her control. Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to have the administrator of Ellis's system access the system. One of ordinary skill in the art would have been motivated to do so in order to allow the administrator to configure and troubleshoot the system. Ellis also does not teach requiring a correct PIN to complete a transaction. However, Official Notice is taken that it is old and well known in the art to require a correct PIN in order complete a transaction. Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate this feature into the cited prior art. One of ordinary skill in the art would have been motivated to do so in order to verify the user's identity.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
